I am unable to proceed in SafeSport, how can I fix this?

If you are unable to proceed in SafeSport after completing one or more of the segments, please sign out and clear your browser's history. Once this has been cleared, please sign back in and this should allow you to proceed. You may also try using another internet browser.

Instructions for how to clear your history may be found by clicking here.

If the Emotional and Physical misconduct module is the one giving you an issue, please attempt the following. Switch to one of the suggested web browsers on SafeSport's website and/or clear your cache in the current web browser you are in. Sometimes you may need to try all of these things, because of different plugins, firewalls and securities on each individuals system/network/computer.
